PARAGON
YACHTS

The Paragon philosophy.

To develop and produce a new generation of uncompromising motorboats with superior performance and seaworthiness, to meet the toughest possible conditions at sea. Paragon safety and quality is based on many years of boat building experience and expert craftsmanship, combined with extensive collaboration with sea rescue services, the coast guard and boat racing drivers. Our boats are built for active people looking for an exciting life of freedom all-year-round. Boats made using innovative measures and ground-breaking design, that are roomy, practical and safe. To own, drive or just to be onboard a Paragon boat, is an thrilling experience in itself.

Att utveckla och producera en ny generation kompromisslösa motorbåtar med överlägsen prestanda och sjöegenskaper för att klara de tuffaste tänkbara miljöerna till sjöss. Paragons säkerhet och kvalitet bygger på mångårig båtbyggartradition och gedigen hantverkskunskap. kombinerat med omfattande samarbete med yrkesmän såsom sjöräddning, kustbevakning och tävlingsförare. Våra båtar är för aktiva människor som söker upplevelser och vill ha maximal frihet året runt. Innovativ och nytänkande design samtidigt som de är rymliga, praktiska och trygga att vistas ombord på. Att äga, köra eller bara att vara ombord på en Paragon är en upplevelse i sig.

Beneath the surface.

What you see does not always make the most important difference. At Paragon it is the deep v-hull that provides the basis for the fantastic driveability and outstanding sea keeping of these crafts. A hull that withstands all conditions and provides a safe ride together with active driving performance. The best of both worlds.

Det är inte alltid det du ser som gör störst skillnad. På Paragon är det den djupa V-botten-konstruktionen som utgör grunden till båtarnas fantastiska köregenskaper. En skrovkonstruktion som klarar alla förhållanden och ger trygg och säker gång samtidigt som den inbjuder till aktiv körning. Det bästa av två världar.

CHAPARRAL YACHTS

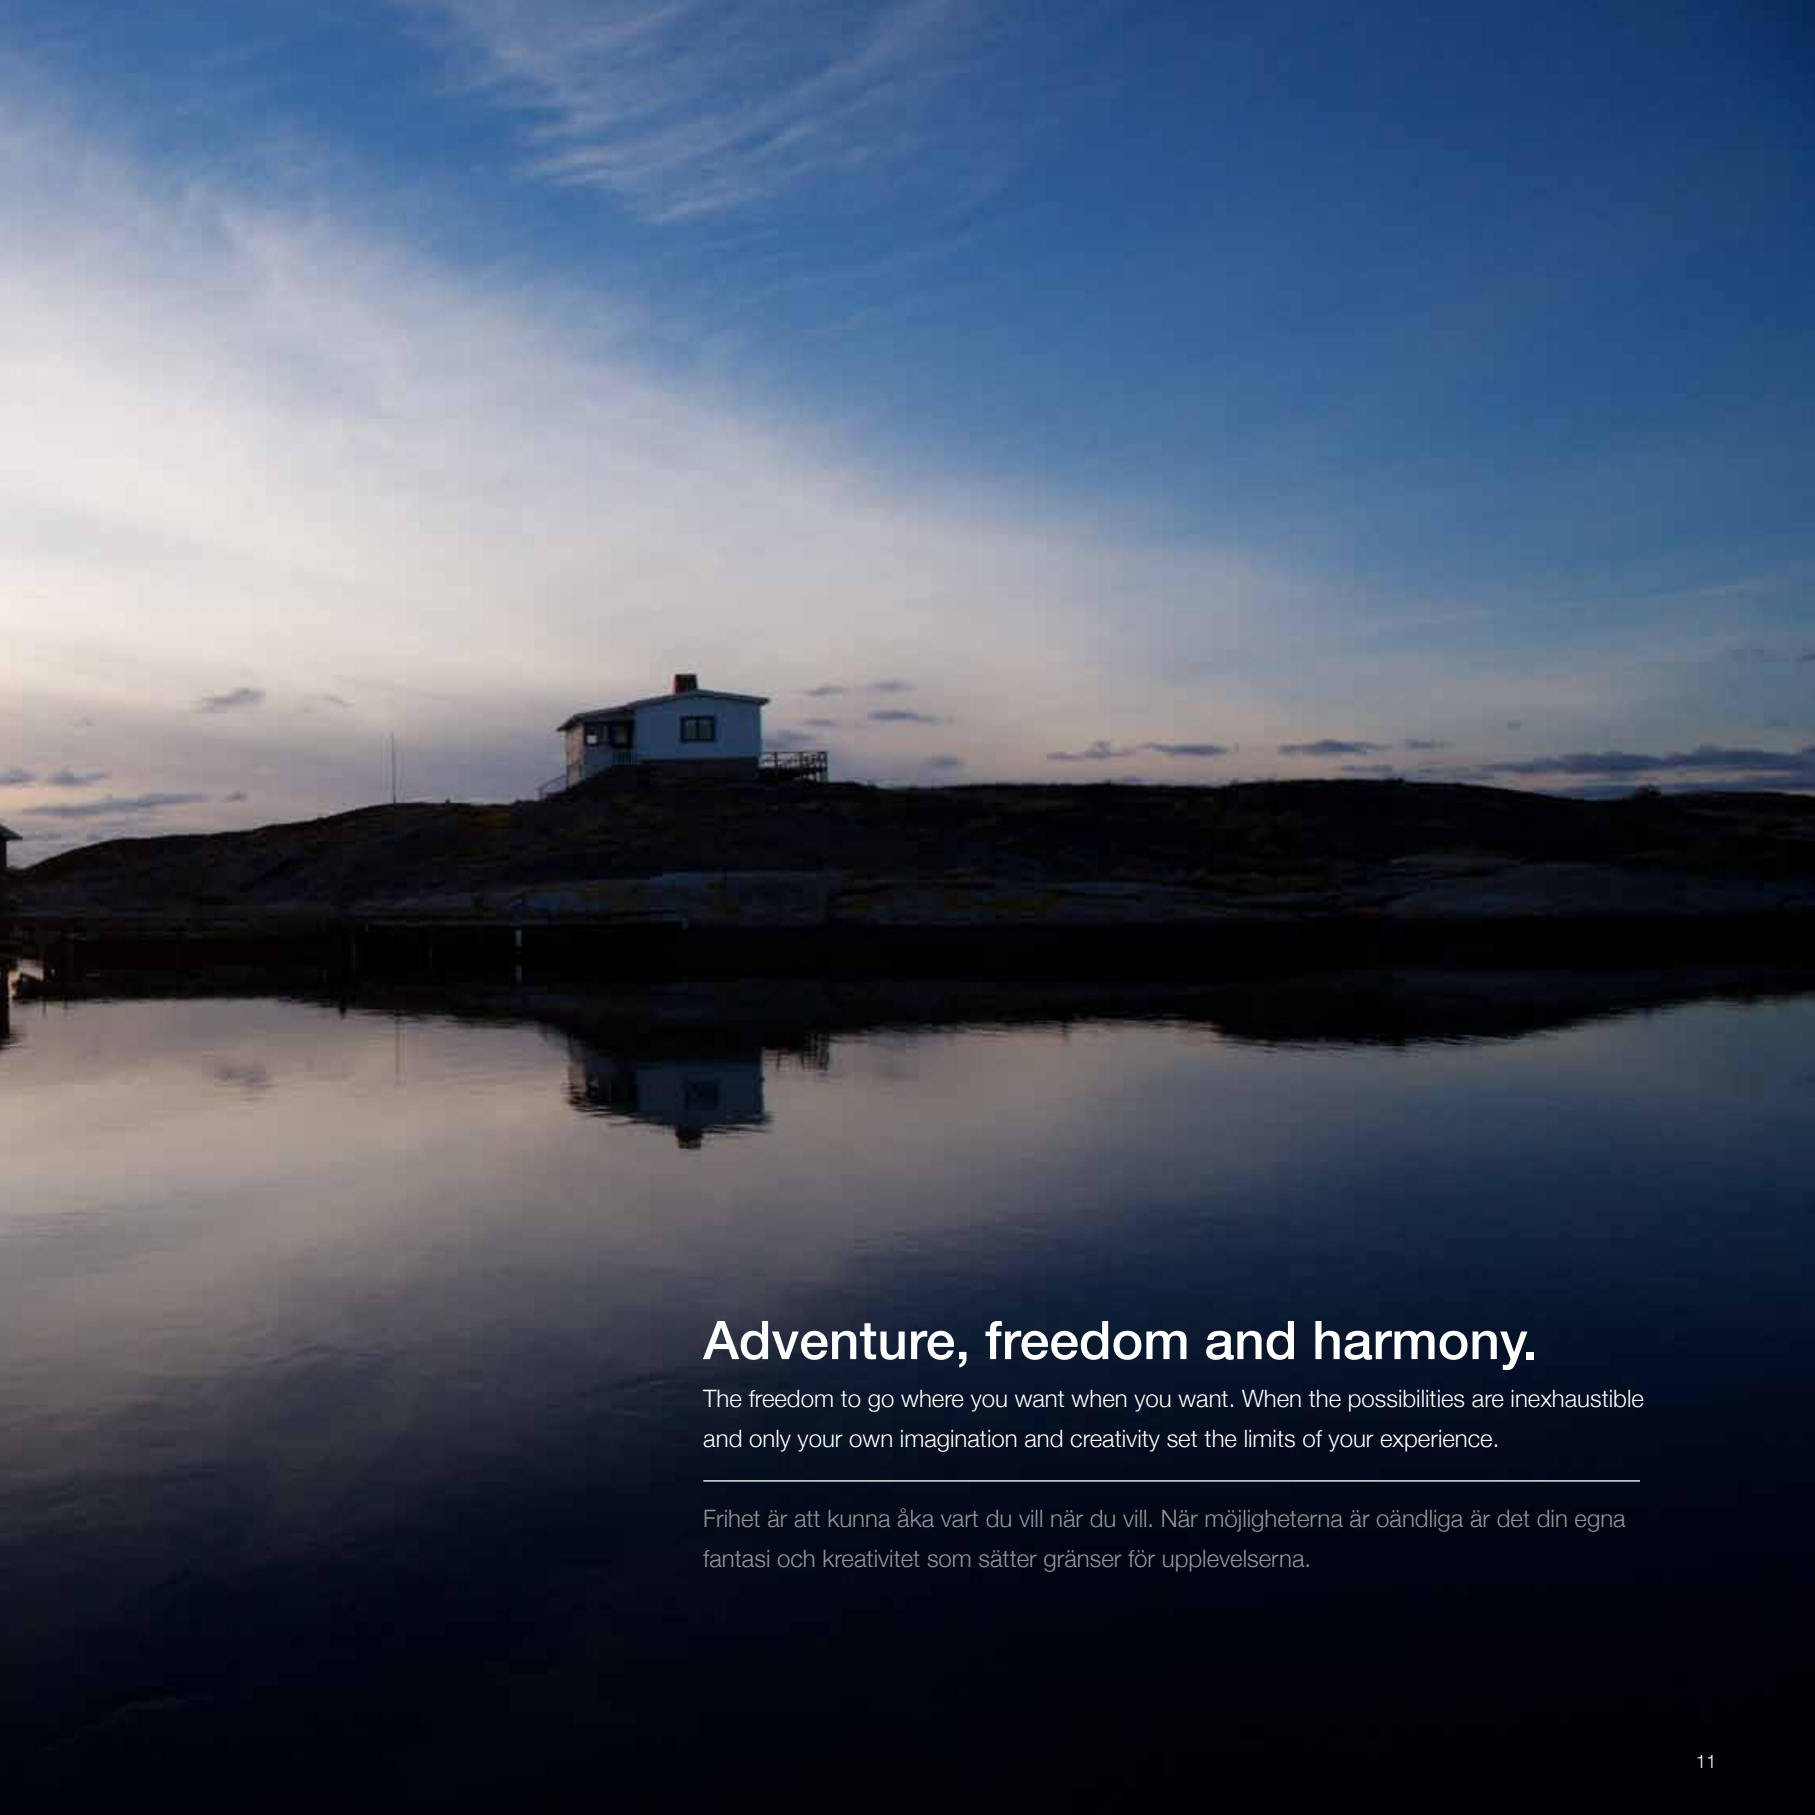

Function before design.

When developing Paragon boats we have worked according to the concept of ”function before design”. We consider function to be the most important property in a boat used by professionals all year round and by active people with high expectations. This might sound obvious when designing and building a boat expected to withstand all conditions.

Under utvecklingen av Paragon har vi arbetat efter devisen ”funktion före design”. Vi anser att funktionalitet är den absolut viktigaste egenskapen för en båt som skall köras av yrkesmän året runt och aktiva människor med högt ställda krav. Det låter kanske helt självklart när man designar och bygger en båt som skall tåla allt.

Adventure, freedom and harmony.

The freedom to go where you want when you want. When the possibilities are inexhaustible and only your own imagination and creativity set the limits of your experience.

Frihet är att kunna åka vart du vill när du vill. När möjligheterna är oändliga är det din egna fantasi och kreativitet som sätter gränser för upplevelserna.
